

Knurled Rivet Nuts & Tools

Large Flange Knurled Series

- Oversized flange on the LFK series Rivet-Nut provides the widest bearing surface and substantially higher push-out values.
- 360-degree contact between the parent material and the rivet-nut creates a built-in spacer on the top surface.
- Large flange disguises common application flaws such as out of round or oversized holes.
- Axial knurls allow for the highest values of torque strength, pull-out and push-through.

Large Flange Style - Zinc Yellow Plating

Small Flange Knurled Series

- Use a small flange Rivet-Nut when the lowest profile is desired.
- The SFK series can also be countersunk without drilling a countersunk hole.
- No special tooling required, even the lightest of hand tools will easily install these versatile fasteners.
- Axial knurl provides better hole fill and therefore increases the rivet-nuts ability to retain its position in the parent material.

Thread Setter Tools

MAR 39200

This quality threaded insert installation tool features patented bearing design, comfortable hand grips and a locking chain. The 39200 installs all sizes of rivet nuts to 1/4"-20 in aluminum and steel. The forged, heat-treated upper handle, precision die-cast body of high strength aluminum alloy, patented fulcrum pin design and comfortable hand grips all combine to make the 39200 a rugged, durable tool. The tool is packaged in a reusable, heavy-duty vinyl pouch containing mandrels and nosepieces to set 8-32, 10-24 and 1/4"-20.

Only \$52.40 - [Click to Buy!](#)

Choose the Marson's 34604

For installing larger size threaded inserts. The heavy duty Thread-Setter tool will install #10-24 through 3/8"-16 threaded inserts in aluminum or steel. Features quick change mandrels and easily adjustable stroke. Tools ship with 1/4"-20 mandrel and nosepiece.

Only \$193 -- [Click to Buy!](#)

Looking for additional mandrels & nosepieces? No problem! Call our sales department and we'll be happy to help:
